To define probability distributions for the simplest cases, one needs to distinguish between discrete and continuous random variables. In the discrete case, it is sufficient to specify a probability mass function assigning a probability to each possible outcome: for example, when throwing a fair dice, each of the six values 1 to 6 has the ...

Story. Doing Data Science Exercises Without Data Cleaning and Coding. So as a data scientists/data journalist/information designer, who is about to teach university courses, I asked is it possible to teach an introductory level class that does not require first learning a lot about data cleaning and coding?
