Smell and Taste Disorders (PDF) - surgerybook.net

Smell and taste disorders are common in the general population, although accurate epidemiologic information is lacking. In the 1970s, the consensus was that more than 2 million adults in the United States had a disorder of taste or smell. A large nonrandom survey conducted by the National Geographic Society in 1987

Ch27: Special Senses: Disorders of Taste and Smell

Description: Loss of the sense of smell or taste is often a sign of neurological disease. Evaluating chemosensation (the senses of smell and taste) during neurological examination can help early detection of neurodegenerative conditions such as Parkinson's and Alzheimer's disease.
