With this second edition of the popular DOM Scripting: Web Design with JavaScript and the Document Object Model comes a modern revision to update best practices and guidelines. It ...

DOM Scripting: Web Design with JavaScript and the Document

The Document Object Model (DOM) is a cross-platform and language-independent application programming interface that treats an HTML, XHTML, or XML document as a tree structure wherein each node is an object representing a part of the document.

Document Object Model - Wikipedia

1.3 Sub-node objects inherit from the Node object. Each node object in a typical DOM tree inherits properties and methods from Node. Depending upon the type of node in the document there are also additional sub node object/interfaces that extend the Node object.

A user agent MUST dispatch this event when the DOM implementation finishes loading the resource (such as the document) and any dependent resources (such as images, style sheets, or scripts).

Document Object Model (DOM) Level 3 Events Specification

The user simply selects the application window and object names from a dropdown list, picks an action to perform and data to use. Test plan documentation

HP Functional Testing software

Geb was born out of a desire to make browser automation (originally for web testing) easier and more productive. It aims to be a developer tool in that it allows and encourages the using of programming and language constructs instead of creating a restricted environment.

The Book Of Geb

The beginning and intermediate-level tutorials on this page were originally based on the second edition of Marty's book Core Servlets and JavaServer Pages, but have been extensively upgraded since then, including coverage of servlets 3.0 and JSP 2.2 (e.g., for Tomcat 7).
